

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1. (Currently Amended) An emergency informing terminal mounted on a vehicle for making an emergency call to an emergency call center in case of emergency, comprising:

a terminal main body in a case, and

a peripheral device incorporated in said terminal main body,

wherein said peripheral device is at least partly in said case, and a wire connecting said terminal main body to said peripheral device is prevented from extending outside of said case, and said peripheral device one of detects shock and detects an elevation of air pressure in said vehicle.

2. (Currently Amended) The emergency informing terminal of claim 1, wherein said ~~peripheral device is~~emergency informing terminal includes a microphone for acquiring a transmission voice signal for hands-free conversation.

3. (Currently Amended) The emergency informing terminal of claim 1, wherein said ~~peripheral device is~~emergency informing terminal includes a speaker for sounding a reception voice signal for hands-free conversation.

4. (Currently Amended) The emergency informing terminal of claim 1, wherein said ~~peripheral device is~~emergency informing terminal includes a communication antenna for processing at least one of data communication and conversation, between the emergency informing terminal and the emergency call center.

5. (Currently Amended) The emergency informing terminal of claims 1 or 4,

wherein said ~~peripheral device is~~emergency informing terminal includes a

primary antenna used in a transmission and reception process.

6. (Currently Amended) The emergency informing terminal of claims 1 or 4,

wherein said ~~peripheral device is~~emergency informing terminal includes a secondary antenna used in reception process.

7. (Currently Amended) The emergency informing terminal of claim 1, wherein said ~~peripheral device is~~emergency informing terminal includes a lighting device, display, or indicator for transmitting an operating state of the emergency informing terminal to the user.

8. (Currently Amended) The emergency informing terminal of claim 1, wherein said ~~peripheral device is~~emergency informing terminal includes an emergency informing button to start an emergency informing process as being pressed by a user in case of emergency.

9. (Currently Amended) The emergency informing terminal of claim 1, wherein said ~~peripheral device is~~emergency informing terminal includes a dial operation unit for making a telephone call to a desired telephone number.

10.-11. (Cancelled).

12. (Currently Amended) The emergency informing terminal of claim 1, wherein said ~~peripheral device is~~emergency informing terminal includes a GPS antenna for acquiring a signal from a GPS satellite.

13. (Currently Amended) The emergency informing terminal of claim 1, wherein said ~~peripheral device is~~emergency informing terminal includes a gyro sensor.

14. (Currently Amended) An emergency informing terminal comprising:

- a) a terminal main body in a case, and
- b) a peripheral device ~~connected to the~~incorporated in said terminal main body ~~and incorporated in said case and including at least, said peripheral~~

device -one of

~~voice signal transmitting means for hands free conversation,~~

~~radio communication signal transmitting means for making radio communications between the emergency informing terminal and the emergency call center,~~

~~display means for transmitting an operating state of the emergency informing terminal to a user,~~

~~emergency informing means for starting emergency informing process,~~

~~dial operation means for making a telephone call,~~

~~shock detecting means for generating a signal showing application of a shock,~~

~~air pressure measuring means for generating a signal showing an air pressure change, and one of detects shock and detects an elevation of air pressure in said vehicle,~~

~~position information acquiring means for acquiring position information from a satellite,~~

wherein said peripheral device is at least partly in said case, and wiring connecting said terminal main body to said peripheral device coupled between said peripheral device and said transmitting means is prevented from extending outside of said case.

15. (Currently Amended) An emergency informing system comprising:
- a) an emergency call center; and
  - b) an emergency informing terminal mounted on a vehicle for making an emergency call to an emergency call center in case of emergency,

wherein said emergency informing terminal includes,

a terminal main body in a case, and

a peripheral device incorporated in said terminal main body,

wherein said peripheral device is at least partly in said case, and a wire connecting said terminal main body to said peripheral device is prevented from extending outside of said case, and said peripheral device one of detects shock and detects an elevation of air pressure in said vehicle.

16. (Currently Amended) The emergency informing system of claim 15, wherein said ~~peripheral device is~~emergency informing terminal includes a microphone for acquiring a transmission voice signal for hands-free conversation.

17. (Currently Amended) The emergency informing system of claim 15, wherein said ~~peripheral device is~~emergency informing terminal includes a speaker for sounding a reception voice signal for hands-free conversation.

18. (Currently Amended) The emergency informing system of claim 15, wherein said ~~peripheral device is~~emergency informing terminal includes a communication antenna for processing at least one of data communication and conversation, between the emergency informing terminal and the emergency call center.

19. (Currently Amended) The emergency informing system of claim 15 or 18, wherein said ~~peripheral device is~~emergency informing terminal includes a primary antenna used in a transmission and reception process.

20. (Currently Amended) The emergency informing system of claim 15 or 18, wherein said ~~peripheral device is~~emergency informing terminal includes a secondary antenna used in a reception process.

21. (Currently Amended) The emergency informing system of claim 15, wherein said ~~peripheral device is~~emergency informing terminal includes a lighting device, display, or indicator for transmitting an operating state of the emergency informing terminal to the user.

22. (Currently Amended) The emergency informing system of claim 15,

wherein said ~~peripheral device is~~emergency informing terminal includes an emergency informing button to start an emergency informing process as being pressed by an user in case of emergency.

23. (Currently Amended) The emergency informing system of claim 15, wherein said ~~peripheral device is~~emergency informing terminal includes a dial operation unit for making a telephone call to a desired telephone number.

24.-25. (Cancelled).

26. (Currently Amended) The emergency informing system of claim 15, wherein said ~~peripheral device is~~emergency informing terminal includes a GPS antenna for acquiring a signal from a GPS satellite.

27. (Currently Amended) The emergency informing system of claim 15, wherein said ~~peripheral device is~~emergency informing terminal includes a gyro sensor.

28. (Currently Amended) The emergency informing system comprising:  
a) an emergency call center; and  
b) an emergency informing terminal mounted on a vehicle for making an emergency call to an emergency call center in case of emergency,

wherein said emergency informing terminal includes,

i) a terminal main body in a case, and  
ii) a peripheral device ~~connected to the terminal main body and incorporated in said case and including at least~~terminal main body, said peripheral device one of:

~~voice signal transmitting means for hands free conversation;~~

~~radio communication signal transmitting means for making radio communications between the emergency informing terminal and the emergency call center;~~

~~display means for transmitting an operating state of the emergency~~

Appln. No.: 09/921,627  
Amendment Dated: July 21, 2005  
Reply to Office Action of: April 21, 2005

MAT-8176US

~~informing terminal to a user,~~

~~\_\_\_\_\_ emergency informing means for starting emergency informing process,~~

~~\_\_\_\_\_ dial operation means for making a telephone call,~~

~~\_\_\_\_\_ shock detecting means for generating a signal showing application of a shock,~~

~~\_\_\_\_\_ air pressure measuring means for generating a signal showing an air pressure change one of detects shock and detects an elevation of air pressure in said vehicle, and~~

~~\_\_\_\_\_ position information acquiring means for acquiring position information from a satellite,~~

~~wherein said peripheral device is at least partly in said case, and wiring coupled between said peripheral device and said transmitting means connecting said terminal main body to said peripheral device is prevented from extending outside of said case.~~
